

Yixiang Fang

ericfang0105@gmail.com • (206) 532-6555 • www.linkedin.com/in/yixiang-fang-30535a265

SKILLS

- **Languages:** Python (Pandas, NumPy, Scikit-learn), SQL, R, HTML/CSS, JavaScript (React)
- **Visualization & Tools:** Tableau Public, ggplot2, Matplotlib, Git, Firebase, Jupyter Notebooks
- **Data Methods:** Natural Language Processing (NLP), Geospatial Mapping, Data Validation, A/B Testing

EDUCATION

The University of North Carolina at Chapel Hill | M.S. in Information Science | May 2026

The University of Washington at Seattle | B.S. in Informatics | GPA: 3.7/4.0 (Dean's List) | June 2024

TECHNICAL PROJECTS

U.S. Health Equity Interactive Dashboard (Tableau, Data Cleaning) | ([View Dashboard](#)) Jan 2026 - May 2026

- Analyzed county-level health indicators to identify a 20-year gap in life expectancy linked to healthcare access and socioeconomic factors
- Performed complex data transformations using Fixed Level of Detail (LOD) expressions and custom aggregations to resolve data inconsistencies
- Designed interactive geospatial maps and scatter plots to visualize the correlation between uninsured rates and regional longevity

Sentiment Analysis of COVID-19 Tweets | Team Project Jan 2025 - May 2025

- Processed and analyzed a dataset of 20 million tweets using Python to identify shifting public sentiment trends during the global pandemic.
- Implemented Natural Language Processing (NLP) techniques to categorize high-volume unstructured data, improving the speed of sentiment extraction by 20%
- Managed large-scale data storage and retrieval, ensuring computational efficiency while handling multi-gigabyte datasets

Research of World Population (R, Shiny) | [Group Project](#) Jan 2023 - Mar 2023

- Developed an interactive web application using R and Shiny to visualize global population growth trends and demographic shifts
- Cleaned and manipulated complex demographic datasets using the Tidyverse (dplyr/ggplot2) to prepare data for time-series analysis
- Presented data-driven insights on population density and mortality rates through automated reporting and dynamic charting

WORK EXPERIENCE

Barnes & Nobles @ UNC-Chapel Hill | Store Assistant | Chapel Hill, NC Jan 2025 - June 2025

- Kept inventory accuracy for 98% of distinct items, using internal systems to track stock levels and prevent supply chain differences
- Optimized order fulfillment workflows by mapping high-demand materials to primary access zones, and reduced team search time significantly
- Managed high-volume daily transactions and record-keeping, ensuring 100% data entry accuracy in a fast-paced environment

CE Cloud | Front-End Developer Intern | Zhengzhou, China Jun 2024 - Aug 2024

- Performed Data-to-UI Validation by auditing 100+ web page elements to ensure that backend data was rendered accurately and consistently across various browser environments
- Documented Technical Discrepancies and functional bugs in a systematic log, providing the development team with clear reproduction steps to maintain site integrity
- Collaborated on Frontend Standards by participating in the team's development workflow to ensure UI components met organizational logic and cross-platform accessibility requirements
